

# UPCOMING PROJECTS

---

## Stafford Chapel

As you read, God has already blessed us with the ability to add a new roof to chapel. Now, we need to do some work on the inside. Chapel is in need of some new flooring, and the back rooms need new windows and doors as well. The total cost for this project is \$5,000 meaning we only need to raise \$2,500 to complete this project.

## Poplar Lodge

Poplar Lodge is a vital building at camp. It is our largest and most rented building. Frankly, without Poplar Lodge we would not have many retreat groups renting camp. It is very important for the future of Great Oaks to keep this building in excellent condition. Presently, the kitchen area is in desperate need of a remodel, and we also need to increase the amount of hot water that reaches the building by upgrading our hot water heaters. In order to make the building even more attractive, we would like to update our audio video equipment and put new flooring in the meeting room. The total cost for this project is \$10,000 meaning we need to raise \$5,000 in order to keep groups booking Poplar Lodge.

## Turkey Roost

Turkey Roost, like Hickory Lodge, is a cabin that is used by our inner city campers during the summer. Since we have remodeled Eagle Nest and built Hickory Lodge, Turkey Roost will be the only inner city building not remodeled. Our goal remains to provide the best camp we can for the inner city children. By adding bathrooms and a large meeting room to the inner city side of camp we will not

only provide a nicer building for the inner city children, but we will also have another building that is available to guest groups. Having this cabin available will increase our funds during non summer months. The cost to complete this project is \$40,000 meaning we need to raise \$20,000 in order to finish remodeling the inner city side of camp.

## New Camp Activities

In an effort to keep camp exciting and fun for the inner city children and guest groups, we would like to add two new activities this year (we have not added any new activities for over six years). Therefore we are hoping to build a giant slide and add a gaga ball court (you can find examples online) while also replacing our basketball hoops. The total costs for this project is \$2,000 meaning we only need to raise \$1,000 in order to add these new activities to camp.

## GAGA PIT
